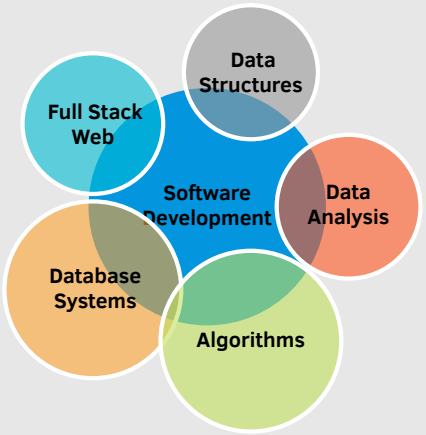
Technical Skills

Overview



Languages

Python Java
Haskell SQL
JavaScript HTML/CSS

Frameworks

React Node.js
Supabase

Tools and Databases

Git Github PostgreSQL

Education

Computer Science and Mathematics (Statistics) (Cum GPA: 3.98)
Pomona College
2025 - 2029 | CA, USA

Projects

2026 **NextBite: Food Waste Monitoring System**

- Designed a technology-driven solution to reduce post-consumer food waste in Pomona College campus dining halls
- Developed a system integrating weighing scales, Raspberry Pi devices, and real-time data visualization dashboards
- Secured $1,500 in funding to support pilot implementation
- Utilized Python for data collection, analysis, and reporting

2026 **USAP Alumni Network Platform**

- Developing a full-stack alumni networking platform serving 500+ students, alumni, and mentors.
- Architected reusable React components and client-side routing to support scalable navigation across user profiles, directories, events, and community pages
- Designed and integrated a relational PostgreSQL database with Supabase, implementing authentication, row-level security, and normalized schemas for users, events, communities, and profile data
- Built responsive, mobile-first interfaces and implemented dynamic CRUD functionality for user profiles, alumni directories, and event management

2025 **Braille Text Analysis Tool**

- Engineered a Python application to translate and analyze Grade 1 and Grade 2 Braille text using custom parsing algorithms
- Implemented text-processing pipelines for character mapping, tokenization, and pattern analysis to improve translation accuracy
- Applied data structures, algorithm design, and string manipulation techniques to support efficient text conversion and analysis

Experience

May 2025 - Present **Web Development Intern** Education Matters

- Develop and maintain responsive web applications supporting educational and research initiatives
- Improve user experience by refining page layouts, navigation structure, and visual hierarchy
- Implement frontend features using HTML, CSS, and JavaScript while collaborating on backend integration where needed
- Debug UI issues and optimize website performance across different devices and screen sizes

May 2026 **FOCUS Program Participant** Jane Street

- Selected for Jane Street's FOCUS program exploring quantitative trading and technology
- Participated in technical workshops and collaborative problem-solving activities

Jan 2023 - Jan 2025 **Vice President** Programming Hub for Youths

- Co-led a community technology initiative providing programming and digital literacy education to students ages 10–15 in Zimbabwe
- Designed and taught beginner-friendly workshops covering HTML, CSS, computer literacy, internet navigation, and problem-solving fundamentals
- Expanded program membership from 17 to 35 students through partnerships and outreach with local schools
